

Owned by Sanken, Allegro offers analog and mixed signal semiconductors, magnetic sensor ICs, analog power ICs, and power management ICs, designed for use in automotive, communications, computer and office automation, consumer products and industrial applications. Standard Power Supplies: AC and DC switching, Llinear, DC-DC isolated and non-isolated power supplies. www.allegromicro.com
Sanken offers advanced AC/DC switching power supplies, standard and custom, for the information, communication and industrial markets. www.sanken-ele.co.jp

Leading global supplier of Discrete, Analog and Logic semiconductors serving the consumer electronics, computing and communications, industrial and automotive markets. Products include MOSFETs, Diodes, Rectifiers, Transistors, Protection Devices, Gate Drivers, AC/DC and DC/DC Convertors and Switching Regulators, LED Drivers, Hall Sensors, LDOs, Logic Devices, Motor Controllers, USB Power Switches, Audio Solutions. www.diodes.com

Top quality connector products for applications such as Computers, Communications, Data Storage, Automotive, Medical, and Industrial. Micro Miniature - Industry's smallest interconnect products. Interconnect for high-speed/broad-band connection. Highest quality. www.hondaconnectors.com

RadHard Digital and Mixed Signal ASICs (.8u to .15u SOI, 10G serdes). Standard Products: SRAMs (4M-46M), NVRAM (1M), SERDES, MCM, 12-Bit A/D and high-temp sensors. Services: Obsolete IC replacements (including FPGA to ASIC Conversions). www.honeywellmicroelectronics.com

High performance isolated and non-isolated DC-DC converters with best in class thermal management and efficiency, focused on performance, reliability, and longevity. Input voltage from 2.5V to 75V and output voltage from 0.8V to 48V with maximum current up to 100A makes them ideal for the industrial, medical, military, and communication markets. www.netpowercorp.com

InnoLight provides high speed, 10G, 40G and 100G, optical transceivers for cloud computing and next generation networking markets. Leading-edge optical component and packaging, high speed optical module design, and low-cost testing capability. Products include 10G SFP+ Ethernet, 10G SFP+ SONET, 10G XFP, 40G QSFP+, and 40G CFP products. www.innolight.com

KOE America/JDI Group (formerly Hitachi Displays) offers monochrome TFT LCD products and solutions. KOE offers IPS technology for TFT displays in sizes from 2.8" to 21.3". Also LCD solutions with PCAP and resistive interface technology. System level display solutions. www.koe-j-display.com

Pericom Semiconductor (now part of Diodes Incorporated, NASDAQ: DIOD), a leading supplier of serial high-speed switching, signal integrity and timing solutions for the embedded, computing, communications and consumer market segments. Company is based in Milpitas, CA with design centers and technical sales and support offices worldwide. Pericom was acquired by Diodes Incorporated in November 2015. www.pericom.com

SEI manufactures RF connectors for DC to 40GHz. (SMA, SSMA, ISMA, Type N, 2.4 and 2.92mm, 7/16, MCX, MMCX, SMB, SMC, SMP and TNC) 50 and 75 Ohm, Attenuators, terminations and loads, ferrite isolators and circulators, power dividers, DC Blocks, GPS and GSM antennas, coax to waveguide adapters and coaxial cable assemblies (standard and custom). SEI also offers custom high quality die castings in aluminum and zinc. www.seimw.com www.seicastings.com

Complete Passive Supplier: Ceramic Capacitors, Aluminum Capacitors, Film Capacitors, EMC Components, Inductors, Transformers, Ferrite Cores, Noise Suppressing Magnetics/Sheets, Wireless Charging solutions, Circuit Protection, Sensors, RF Components, SAW filters, BAW Filters, Band Pass Filters, Diplexers, Balun, Couplers, Chip Antennas, Wireless modules. www.tdk.com www.epcos.com

Analog and mixed signal electronics custom ASIC supplier. Agile ASIC allows for configurable analog and helps customers protect IP, extremely low power consumption. Triad develops highly optimized full-custom analog and mixed signal IC solutions. Unique to Triad, these mixed signal ICs are reconfigurable through "via-only" mask changes. www.triadsemi.com

Batteries and Battery Packs, Rechargeable and Primary (non-rechargeable). Chemistries include: LiON, NiMH, Silver Oxide, Zinc and Alkaline. www.varta-microbattery.com

3D Plus offers a full line of radiation tolerant products, including memories, POL converters and peripherals, industrial memories, camera heads, and more complex System-In-Package (SiP) solutions. www.3d-plus.com
